ÉDUCATION

- National School of Computer Science 2021-2024
- Preparatory Institute of Engineering Studies of Tunis 2019-2021

PROJECTS

Football result prediction Website: B-Bet

- **tools:** Machine Learning, Plotly, HTML, CSS, JS

this website can predict the match result probability as long as it visualizes the most important statistics that can affect the match result

Logik :

- **tools:** Flutter

it's a serious game composed of 4 mini-games that aim to boost the knowledge of users

Disease Detector :

- **tools:** Deep learning, Computer Vision, Flask

Disease-Detector is a web application designed to help health professionals or patients to diagnose quickly and effectively diseases from medical images.
